Brief Profile

Sagar Dake- Assistant Professor

Computer Science Academic | Researcher | Editorial Board Member

Sagar Dake is a Computer Science academic and researcher based in Auckland, New Zealand, with over a decade of experience in higher education, research, and applied computing. He currently serves as an Assistant Professor at Yoobee Colleges, New Zealand, and is pursuing a PhD in Computer Science at Auckland University of Technology (AUT).

He was awarded the **Research Scholarship by Auckland University of Technology in 2026**, recognising his academic research engagement and scholarly development.

His scholarly contributions include **seven research publications, comprising three papers available through IEEE Xplore and four articles published in academic journals**, reflecting his active engagement in scientific research and knowledge dissemination.

His academic and research expertise spans Blockchain Technology, Artificial Intelligence, Machine Learning, Data Science, Software Engineering, and Emerging Digital Technologies. His research interests focus on the design, development, and evaluation of intelligent, secure, and scalable digital systems, integrating theoretical foundations with practical technological innovation.

Through his teaching, research, and scholarly contributions, he continues to advance interdisciplinary perspectives in computer science, emerging technologies, and digital transformation.
